

COUNT Excel Function

This Basic Excel Function is used to Count the numeric value in one or more cells or Range.

=COUNT(

COUNT(value1, [value2], ...)

Example

=COUNT(A1:A5)

SUM ▾		✕ ✓ <i>fx</i>	=COUNT(A1:A5)	
	A	B	C	D
1	10	=COUNT(A1:A5)		
2	5			
3	A			
4	9			
5	10			
6				

Result = 4 (This will exclude Cell A3 since this formula calculate only Numeric value. See Image below)
