

COUNTA in Excel

This formula is used to count the value in one or more cells (This will count the cells irrespective of Number or Text value)

=COUNTA(

COUNTA(value1, [value2], ...)

Example

=COUNTA(A1:A5)

SUM		:	X	✓	<i>fx</i>	=COUNTA(A1:A5)
	A	B	C	D		
1	10	=COUNTA(A1:A5)				
2	5					
3	A					
4	9					
5	10					
6						

Result = 5 (This will Include Cell A3 since this formula calculate both Text and Numeric
